Phase Change Energy Solutions: Leader in Efficient ... Phase Change Energy Solutions is a global leader in the development and deployment of innovative energy-efficiency and thermal storage solutions that harness the power of phase change materials. Customers including the U.S. Government, regional retail chains, and Fortune 100 banking, telecom, hospitality, and technology companies have installed millions of square feet of our products with proven results. Phase-change material - Wikipedia A phase change material (PCM) is a substance with a high heat of fusion which, melting and solidifying at a certain temperature, is capable of storing and releasing large amounts of energy. Heat is absorbed or released when the material changes from solid to liquid and vice versa; thus, PCMs are classified as latent heat storage (LHS) units. PCM Products - Official Site Phase Change Materials (PCMs) are ideal products for thermal management solutions. This is because they store and release thermal energy during the process of melting & freezing (changing from one phase to another.

Frequently asked questions about phase change materials Phase change materials (PCM) are substances that absorb and release thermal energy during the process of melting and freezing. When a PCM freezes, it releases a large amount of energy in the form of latent heat at a relatively constant temperature. Phase Change Material (PCM) Selection | PCM Technology Other PCM materials such as non-paraffin organics, and liquid-to-gas phase change materials are available, but are not often used for electronics heat sinks. Metallic PCMs are generally used at high temperatures, where no suitable paraffin wax is available. Table 1. Phase Change Materials Market to See Worldwide Growth by ... This report released by Researchvector on the Phase Change Materials market is an all-encompassing research on the market trends of Phase Change Materials industry. The updates are key to the said market and will provide an assessment of majorly all the important data of the Phase Change Materials market. Phase Change Materials Market Size - PCM Industry Share ... Phase Change Materials Market, By Product. Paraffins held maximum share of global PCM market in 2016. Paraffins are widely used in end-user industries such as packaging, building & construction and textiles. Paraffins consist of straight chain hydrocarbons. It forms a good phase change material for selective temperature ranges and certain applications. Types of Phase Change Materials - PCM Products In selecting phase change materials the main phase change of interest is the solid/liquid phase change. There are other types of phase change which also store and release latent heat energy during their transition, but these are generally not practicable for most energy storage applications.

Phase Change Fabrics Control Temperature - NASA phase change materials (mPCMs) into all of its products, including automobile seat covers, bedding products, and a full line of apparel for both ordinary and extreme conditions.
